## Children Leading Change

Global Dream is a programme of complete empowerment of the illiterate and underprivileged populations of India, with special emphasis on the participation of school children as leaders of change. Hundreds and thousands of children of all ages, along with their parents, are engaged in helping make India literate, using a powerful toolkit that enables a person to become literate in a matter of weeks not months.

A student in Kanpur teaching her maid.

## What's Your Share?

Schools can participate in 3 ways:

### Home-Based Program

Student-mentors teach a learner of any age (6-60) at home with the help of their parents. This may be an illiterate domestic helper, for example.

### Community Based Program

A Global Dream Lab based in a near by slum available can help make that a slum totally literate.

### School-Based Program

A Global Dream Lab at your school allows more learners from the nearby to become literate, nurturing valuable leadership skills in your children.

### SCHOOL AS A LIGHTHOUSE

*With enthusiastic embrace of the literacy program, it is possible that a school makes not only its own school community literate, such as all their support staff, bus drivers and their families, but also spreads the light of literacy to the immediate neighbourhood of the school, with the vision to leave no one behind.*

Literacy is the first stepping-stone to formal education of children and a path to freedom for the adults. The positive benefits of literacy are numerous.

A Cambridge study in India found that a mere 4% increase in literacy rate would have the same impact as increasing by 25% per capita income.

Literacy has been found to be the only significant predictor of public health.

Sadly, over 25,00,00,000 illiterate adults, or nearly 40% of the global total, are Indians. And there is no effective program for the lakhs of Indian children aged 6-14 who are currently out of school for whatever reason.

### Leader of Change Certificate
